20	A dedicated IP is an IP address that's only provided to a single user as a usage preference and for security purposes. A semi-dedicated IP is an IP address that's provided to multiple users for affordability.	20	A dedicated IP is an IP address that's only provided to a single user as a usage preference and for security purposes. A semi-dedicated IP is an IP address that's provided to multiple users for affordability.
21		21	
22	− If a user purchases a dedicated IP for their hosting, VPN or proxy server, they should simply be able to verify that the IP is exclusive to their account / user ID.		
23	−		
24	This dedicated IP checker is improving the standard of transparency where dedicated IP addresses are purchased and will help prevent them from being shared between users (intentionally or unintentionally).	22	This dedicated IP checker is improving the standard of transparency where dedicated IP addresses are purchased and will help prevent them from being shared between users (intentionally or unintentionally).
25		23	
26	Why are dedicated IPs important and why should users be able to verify dedicated IP exclusivity?	24	Why are dedicated IPs important and why should users be able to verify dedicated IP exclusivity?
